

# WINCH

## Operation

1

Using your code, collect the key from the Key Safe.

2

Unlock emergency stop button and turn isolator to "ON"  
Carefully lay out winch rope and attached pulley to the strong point.

4

Operate the winch using foot switch, tailing the rope hand over hand.  
If the footswitch doesn't operate check for stones under the pedal.

5

After use, remove the pulley from the strong point at the top of the slipway and coil the winch rope.

3

Ensure the slipway is clear of people. With a banksman guiding the boat from the port side, load winch with 2-3 turns. .

6

Depress the emergency stop button on the winch control box and remove the key.

Using your code, replace the key in the Key Safe.
