THE RANNIE. This is an area of turbulence caused by converging currents, which extends from Lavernock Point toward Flat Holm and should be treated with extreme caution / respect since **surface water conditions can be very rough when certain winds prevail.**
- 11/.** Early entry is advisable, as entrants may have to be restricted due to the volume of vessels requiring locking through the Barrage, at the start and finish of the Competition.
- 12/.** Barrage Control tell us that locking out for the start of the Competition can be achieved in a reasonable length of time, approx. 60 boats locked out in 45 minutes. That is the three locks, locking out 10 boats each, at a time. The most delay is likely to be caused by boats sorting themselves out ready for the lock.
- NB. You cannot book a lock. You must call the Barrage when you are ready and then they will tell you which lock to use and when to enter it.**
- 13/.** The Competition is held in an area adjacent to the main shipping channel to and from the Port of Cardiff. Please do not anchor or wait in the approach channel. If it is necessary to cross the approach channel, particularly the buoyed channel (known as the Wrach Channel), Please do so as quickly as possible and at a right angle.
